	QUALITY POLICY	Rev.: 3 Fecha: 25/01/2019

The Management of 3G Since 2000 S.L. declares that the priority objective of the company is to pay maximum attention to each of the activities we carry out, to each decision we make and to each action we take, continuously improving the Quality Management System.

This philosophy must be assumed in each of the Departments of 3G Since 2000 S.L. through faithful compliance with the following principles:

MISSION:
Offer a wide range of high-quality enzymes and complementary products at very competitive prices.

VISION:
Consolidate ourselves as specialized enzyme distributors in the national and European market, and expand our activities internationally.

VALUES:
- Full satisfaction of our clients, offering products and services that satisfy their expectations. For this reason, we focus our actions on identifying, evaluating and defining the client's requirements, their needs and expectations, in order to satisfy them.
- Motivate all our collaborators in terms of quality.
- Comply with all the specifications, standards, legal or other established requirements.
- Promote communication between our workers as an instrument and way out of all the human creative potential.

This Quality Policy provides a framework for establishing and reviewing quality objectives.

Mr. Daniel Garcia
General Manager
